Allowable Subject Matter

1. Responsive to the paper filed on December 21st, 2005.

Claims 1 – 15, 17, 18 and 20 are allowed.

2. The following is an examiner's statement of reasons for allowance:
 - The references cited for rejections themselves or the combinations cannot be used to fully reject the allowable subject matter.
 - a) References cited by examiner do not teach "code branches itself comprises two or more code branches". Hiranandani reference, examiner cited, teaches an IPA compilation system with two or more branches. Yet, the IPA compilation systems cannot handle a call graph with unknown, or non-annotated, edges. Therefore, the conventional IPA systems are limited because they cannot process an incomplete call graph, cannot be used to combine with Ayers reference for "code branches itself comprises two or more code branches".
 - b) The combination of examiner cited references fail to teach "a control flow code which can be used to direct a program flow to the associated code branch".

3. Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
